Because One Size Does Not Fit All...

We offer PAPER straws in four standard lengths and multiple diameters.

## What's the Best Diameter for the Drink?

- [5mm] diameter straws are typically used for kid's drinks or adult drinks served in highball glasses.
- [6mm, 7mm] diameter straws are the standard opening size.
- [8mm] diameter straws are typically used for mixed or blended drinks such as malts and smoothies where better pull through is required.
- [10mm, 12mm] diameter straws are typically used for milk-tea and solid beverages.

## Today's Straw Trend...COLOR!

Accessorize your tabletop or to-go cups with brightly colored and patterned straws. From basic black to stripes. We have different ways to add that extra pop of color to your service. Eco-Conscious Solutions Our Environment-friendly straws are available in paper. Our straws are one 100% renewable resource. Our paper straws are biodegradable.

## Individually-Wrapped or Bulk Packs

Keep your straw service sanitary, especially in high-volume venues such as cafeterias and fast food restaurants. We stock a variety of individually rapped straws in most sizes and colors. Unwrapped bulk packs are also available.

# PAPER

## STRAWS

### Paper Straw Q&A:

#### **Are they safe to use with food?**

Yes, they are totally safe.

#### **Are your straws biodegradable?**

Yes. Our straws are safe for you and the environment. They are made of paper and a food grade adhesive that will break down quickly in a compost, marine, or landfill environment

#### **How long do they last when in use?**

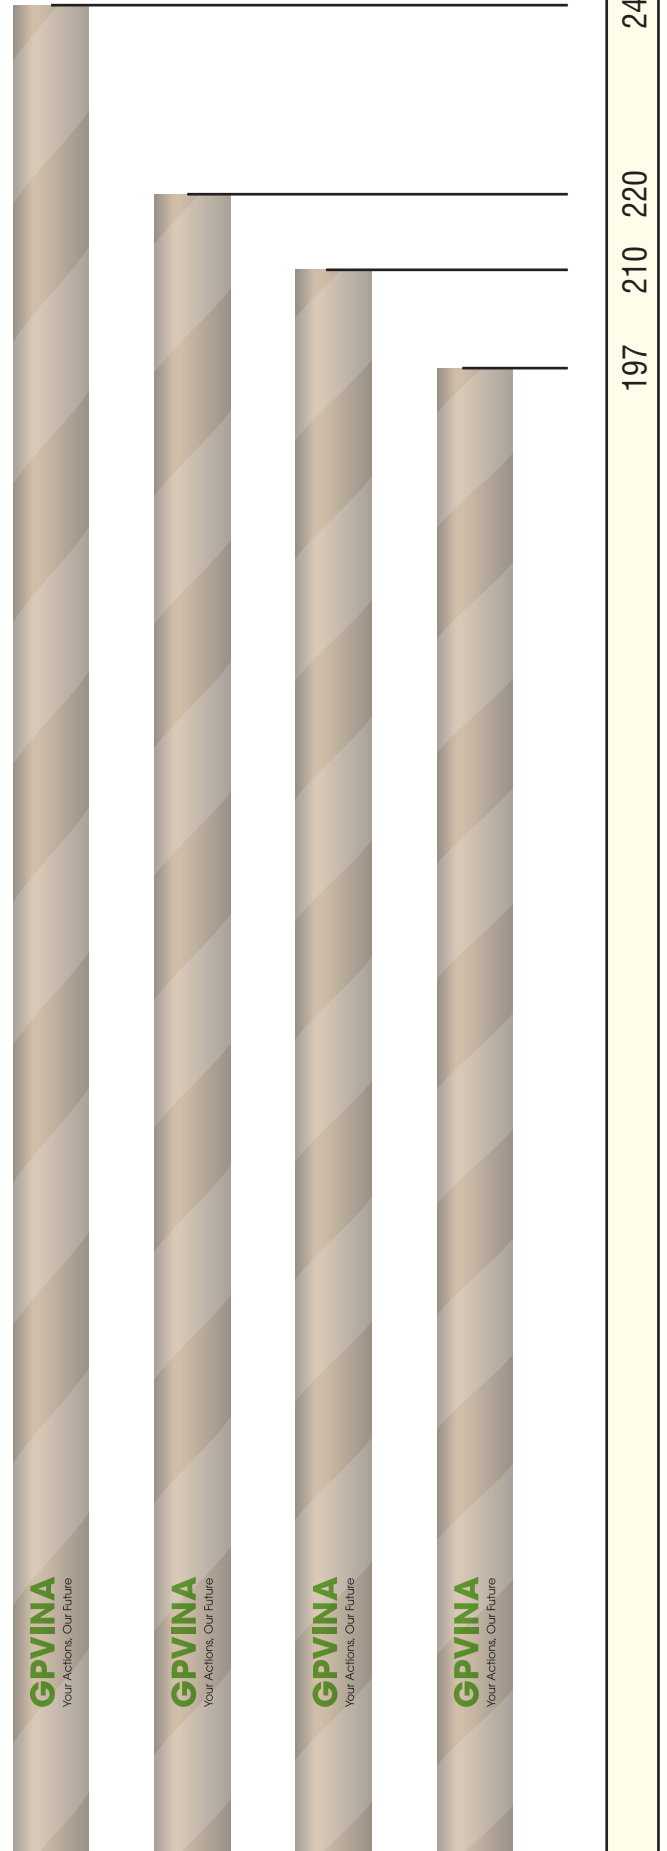

They are designed to be single use, but your paper straws will last up to 4 hours before getting soggy - far beyond the typical length of a meal service.

#### **Can they be used in hot beverages?**

Yes. All of the components are food safe, for best performance in hot and cold beverages.

#### **Are custom straws an option?**

Yes. Custom designs available, lead times may vary.
